Arctic & Geotechnical Engineering

August 24, 2002

To whom it may concern

Subject: Terra Firma Inc.

Terra Firma has provided geotechnical testing for Duane Miller & Associates since 1998 when Ron Caron and Tamara Selmer established their business. Before that, Ron had been the lead person for testing services for many of my projects back to 1990.

The Terra Firma laboratory has provided soils testing for us on a timely and efficient basis with a high level of quality. They have readily adapted our requirements for digital reporting of test data. Most importantly, their experience has allowed us to design unique testing methods when non-standard questions need to be answered. I will continue to use them for our future testing needs.

I am confident that this same level of quality service would be provided to you.

Very truly yours,

Duane L. Miller, P.E.
