TO WHOM IT MAY CONCERN:

RE: Letter of Recommendation

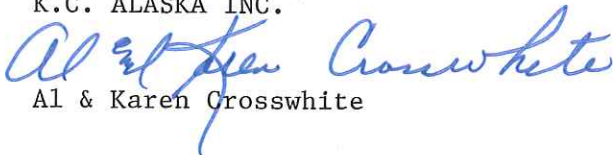

Over the past few years, we have used Ron Caron and Tamara Selmer of Terra Firma, Inc. for material testing on our jobs, primarily last year on the Finger Lake Boat Ramp and Susitna Landing Boat Ramp. They have also been doing our testing and soil reports at Denali Elementary School and the Chugiak High School.

Our experience with Terra Firma has been excellent. During our short civil work season, they have always responded to us on any short notice. When a difficult compaction has been encountered and more proctors are required, they always responded and have saved us time and money by being there when we need them.

We feel that they are a very definite asset to the construction industry and would recommend them highly.

Sincerely,

K.C. ALASKA INC.

Al & Karen Crosswhite
