Re: Letter of Recommendation  
Terra Firma Inc.

To Whom It May Concern:

We have utilized Terra Firma Inc. for both materials testing and Contractor Quality Control services. We have never received any but the best service from Terra Firma. Ron Caron and Tamara Selmer make themselves available whenever necessary and truly understand a contractors needs in the construction industry.

Terra Firma has the experience and knowledge to address materials testing issues across the state. This experience allows them to not only provide the necessary materials testing services, but also participate in the resolution of problems that arise on projects. Terra Firma's professionalism and active participation in each project makes them an asset to any contractor.

We recently retained Terra Firma for our Anchorage International Airport Concourse C Replacement project. As well as providing materials testing, Ron Caron was our Quality Control Manager on this \$34,000,000 project. Ron was responsible for coordinating our work with the Owner, the Special Inspectors, and the Municipality of Anchorage. He was also responsible for all submittals and as-builts. Terra Firma proved they have the capability of providing any services necessary for a contractors quality control program.

We look forward to our next project with Terra Firma Inc.

Kiewit Construction Company
