

Erik Boatwright

ICC Special Inspector/Engineering Technician

EDUCATION

Civil Engineering, University of Alaska – Anchorage, 2002

GENERAL EXPERIENCE

Erik has worked 17 years as a technician performing Quality Assurance Testing and IBC Special Inspection. He is excellent at working with clients and owners, determining their needs and providing the services they require. Erik is responsible for performing soil density, concrete, masonry, and asphalt tests in addition to Special Inspection assignments. Erik has had experience on a variety of different construction projects across the state ranging from public to private facilities; military structures; schools and hospitals.
