

Aaron F. Kaiser

Material Testing Technician

GENERAL EXPERIENCE

Aaron is a material testing technician providing Quality Assurance/Quality Control (QA/QC) testing for a variety of construction-related projects across Alaska. Aaron has 3 years of experience providing QA/QC testing of soils, concrete, and asphalt materials and is certified to operate Troxler nuclear soil density gauges. Aaron is an ACI certified concrete field testing technician. Aaron is versed in most standard ASTM soil/concrete test methods, and routinely executes these tests in both field and laboratory settings. Aaron has repeatedly demonstrated an ability to work closely with client, design engineer, and contractor to provide QA/QC testing and inspection services which conform to project specifications and help ensure contractor compliance. Aaron's extensive background in residential/commercial construction as a carpenter has provided him with insights into the role of QA/QC on a construction site and translates into an ability to work seamlessly with construction site personnel to accomplish QA/QC goals without impeding project progress. Aaron has extensive North Slope experience.
